How to Layer the Lights for a Soft, Warm Inviting Feel

Lighting shouldn't just illuminate a space but should elevate it.

June 2, 2025 Design Trends, Design & Architecture

By: Melissa Dittmann Tracey

Ambient Lighting: Setting the Foundation

This is your room's general lighting—the base layer that ensures the space is evenly lit.

Examples:

Recessed ceiling lights

Flush-mount or semi-flush fixtures

Large pendant lights or chandeliers

Ambient lighting provides the overall light of the room but don't expect it to do the heavy lifting when it comes to brightening work areas or highlighting special features.

Task Lighting: Bringing Function with focus.

Task lighting zeroes in on the places where you need extra light to see clearly and work effectively. This type of lighting can improve usability and comfort.

Examples:

Desk lamps for your home office

Under-cabinet lighting in the kitchen

Reading sconces beside the bed

Accent Lighting: Adding Drama and Detail

Accent lighting is what adds depth, highlights decor and draws attention to focal points in a room.

Examples:

Picture lights above artwork

LED strips under shelves or inside cabinets

Wall sconces or directional spotlights

Think of accent lights as the finishing touch. They're not about brightness—they're about style

With National Senior Fraud Awareness Day that was on May 15

We wanted to share some common scams that often target older adults. Scammers are constantly finding new ways to deceive, but being informed can make all the difference.

Some scams to watch out for include:

Tech support scams - Fraudsters pretend to be from well-known tech companies, claiming your computer has issues and requesting remote access.

Government impersonation scams - Callers pose as government officials, threatening legal action unless you provide personal information.

Grandparent scams - Scammers impersonate a grandchild in distress, asking for money urgently.

Romance scams - Criminals build online relationships and eventually request financial assistance.

Medicare scams - Scammers pretend to be from Medicare, offering fake services to steal personal details.

Sweepstakes scams - You're told you've won a prize but must pay upfront to claim it.

To protect yourself or your loved ones, always verify identities, be cautious of unsolicited requests for personal information, and use official contact channels for verification. If you suspect fraudulent activity, report it to the authorities or go to the

FBI's Internet Crime Complaint Center @ https://www.ic3.gov
